

## TECHNICAL DATA SHEET

### Optimuz Pro 15 - High Performance Hybrid

High quality hybrid - multilayer

Exceptionally fast shrinking due to UltraShrink™ Technology

OPTIMUZ PRO is a high-quality hybrid automotive window film for the professional industry. This non-reflective window film is constructed from several high-quality components in several layers. For example, metallic pigments are combined with the modern DD-SYSTEM™ technique, in which color pigments become colorfast. This results in a special color-stable film with high solar energy protection, crystal-clear see-through and very fast installation. Adheres particularly nicely to grids (dot-matrix) and can be deformed very easily.

#### Features

- crystal clear transparency
- high heat rejection;
- infrared (IR) rejection
- UV blocking
- hybrid construction of metallic and color-stable pigments
- bonds nicely to the grids (dot-matrix)
- UltraShrink™ technology
- Easy-Dot™ installation
- roll length: 30,5m

#### Technical information

	Visible light transmission	16%		Glare reduction	N/A
	Solar energy rejection	52%		Visible light reflection	8%
	Infra red rejection (760 - 2500 Nm)	37,4%		Ultra violet rejected	99%

#### Warranty

SunRage window films are developed for the professional market and are known for years of reliability and comfort.

#### Garantie

SunRage Tuningfolien werden für den professionellen Markt entwickelt und sind für jahrelange Zuverlässigkeit und Komfort bekannt.

Superior clarity

Easy shrinkage and installation

Good adhesion on the dot matrix
